

**In the Claims:**

Please amend the claims as follows:

✓  
In claim 5, please delete "any preceding claim" and replace therewith  
--claim 1--.

Please add the following new claim.

C1  
22. A composition according to claim 21, wherein said fibrotic growth factor  
is selected from the group consisting of TGF $\beta$ -1, TGF $\beta$ -2, PDGF, and mixtures of two  
or more thereof.

**REMARKS**

Claims 1-22 are now pending in the application. Support for new claim 22 is  
found in originally filed claims 2 and 3 and at page 15, third paragraph.

**Applicants' Invention**

Applicants' invention relates to the use of non-fibrotic growth factors and  
fragments, such as TGF $\beta$ -3 or FGF or their fragments, to promote wound healing with  
little or no scarring as compared to natural healing processes. The non-fibrotic growth  
factors or fragments are used in combination with either (1) no fibrotic growth factors,
